place-holders.

ASURE ID® 7 IS HERE.

- Friendly and Intuitive Interface Enhanced user experience makes photo ID card design and data entry a breeze.
- Choose Your Source Easily print cards from records stored in Asure ID's internal database. Or with our real-time data exchange feature Live Link, you can share across multiple workstations directly from your network's HR, security or ERP database, adding Oracle*, MySQL, LDAP and Microsoft* SQL Server database support.
- iDIRECTOR* Designed for the most sophisticated secure credential applications, you can improve smart card development and deployment with this encoding module. iDIRECTOR manages card memory, loads multiple smart card applications, and graphically personalizes smart cards such as iCLASS* Seos* in one seamless process.

Productivity has never looked better.

Asure ID 7 changes the paradigm of how ID card personalization software looks, feels and performs. A modern user interface and simplified processes make ID card template design and data entry extremely easy. With Asure ID, you have everything you need to design and populate a card, allowing you to glide from card design to data entry to printing and reporting.

Everyday work made effortless.

Routine tasks can be performed with a couple of mouse clicks. It's a snap to capture or load a photo, void a card or set the print counter. And you can utilize Live Link to connect to several external data sources. These and other frequently-used features are within easy reach on the Microsoft "ribbon"-inspired toolbar.

Standard features:

Asure ID "remembers" with automatic startup loading of the last template and report used, while also limiting or granting access to specified Asure ID modules and templates through advanced user defined privileges

Quick Filter wildcard search on any field in the database. Global Find extends this convenience across all linked databases and templates.

Auto-Enhance a records photo with the click of a button.

Asure ID Exchange features:

iCLASS* SE open encoder platform support for end-to-end security, control, and flexibility of your physical access control solution (PACS) credentials. Issuance to a FARGO* card printer with an embedded iCLASS SE encoder allows you to create, encode (read/write), and manage PACS credentials on-site, streamlining your ordering, inventory management, and issuance processes.

Laser Configuration Module features an Intuitive interface that manages data and visual security elements to be printed, encoded and engraved into credentials -- in one unified card template.

Customized Reporting Securely Delivered

In addition to standard ready-to-view reports, manipulating data with filtering, sorting and grouping has never been easier, and configuring and saving it in a custom report is simple. And with definable reporting privileges extended to application-wide password protection, Asure ID Exchange enhances your ID data security.

Supports Windows® Pro Tablets

HID GLOBAL® IS THE LEADER IN SOLUTIONS FOR THE DELIVERY OF SECURE IDENTITY.

Asure ID is just one part of a complete, integrated system for the issuance, management and authentication of secure IDs. Your HID Global dealer can custom design a secure identity system using proven HID components including:

- FARGO® ID Card Printer/Encoders
- Cards, ribbons, films and overlaminates
- ID card production services
- HID contact and contactless card readers, including iCLASS® smart card readers
- HID* Lumidigm* Fingerprint Sensors

The suggested minimal system requirements for Asure ID 7 are:

- 1 GHz or faster processor
- 1 GB RAM

1 GB available hard disk space

Free trial download is available from: hidglobal.com/asure-id
